SUMMER SCHOOL PROGRAMME
European Business Challenges
August 16th - 25th 2019

Solvay Summer School is an awesome opportunity to make new friends from all around the world and decide if studying abroad is really for you!

Fruitful moment creating new knowledge, friendships and experiences!

The Solvay Summer School intends to equip students with the state-of-the-art knowledge and tools of the general management in a European context. The programme features classes, trips, and activities designed to give students the opportunity to learn about European business challenges.

Our Summer School is a unique experience for undergraduates. It will enable students to acquire vast amount of information and know-how regarding the current European economic situation in an interactive way, all while discovering Brussels, the wonderful capital of Europe. In addition, it is an excellent opportunity to build up an international network and to become a Solvay Alumni.

During the Solvay Summer School you will be attending lectures given by internationally well-known professors and researchers from different backgrounds, while getting a taste of what Solvay Brussels School of Economics and Management is all about.

Solvay Summer School is not only a learning experience, it is also focused on students. Indeed, it is organized by students for students. This will give you the opportunity to experience a real Belgian student life and culture. In addition to the lectures, visits and excursions are planned during the week.

It is a great opportunity for all students to gain new insights, knowledge and to make friends from all over the world. You can attend courses relevant to your future specialities and career whilst enjoying your summer break!

Brussels, the capital of Belgium, is located in the middle of Europe and hosts a considerable number of international organizations, including NATO and the EU Parliament.

The city has two official languages: Flemish and French. Many speak English, as well.

Brussels is a real student city with more than 86,000 students. Chocolate, beer and Belgian fries are among the many things that will make you fall in love with this city!

Solvay Brussels School of Economics and Management (SBS-EM) was founded by Ernest Solvay in 1903. It is ranked first, among all Belgian Business Schools, for its Master’s programme in Management.

This result is mainly due to its demanding courses, its perfect location in Brussels and its education programme that successfully combines management and economics courses. SBS-EM is also part of a university, the Université Libre de Bruxelles (ULB).
Main Course
The course provides a broad overview and analysis of the business environment in the European Union. The main emphasis is put on European entrepreneurship, geopolitical concerns and on understanding of European economic news. The institutional structure of the European Union will be slightly examined and students will have the opportunity to visit the European Parliament. Finally, the main issues of doing business in Europe will also be addressed.

Option Courses
The participant will have the opportunity to choose a tailored option that aims to provide an analysis of “Entrepreneurship and Technology”, “Economics and Finance”, “Business Law” or “Advanced Business” with half of the courses being given on the specific topics. It develops students’ grasp of business, economics and policy issues and especially their interactions.

Economics & Finance
Taught by renowned teachers with significant industry and research experience, our programme offers courses introducing students to cutting-edge economics and financial theories and their application to European issues including anti-globalization, FTA, insurance regulation, banking risk and performance. The aim is to build your analytical problem-solving proficiency as well as help you navigating through the European financial system.

Entrepreneurship
The Entrepreneurship programme aims to equip students who embrace the entrepreneurial mindset with perspectives on management practices and leadership. With a focus on Business Models Canvas, innovation, relationship marketing and soft skills, this programme has been designed to foster your ability to think like an entrepreneur. Through interactive workshops led by marketing experts, ensure your future as the next generation of change-makers.

Advanced Business
Designed to cultivate a passion for the European Union’s political events, our Advanced Business programme is tailored to ensure the acquisition of a strong body of knowledge in business management control systems. The programme allows you to dig deeply into current topics that are relevant to present-day business practices including digital strategy and Fintech in order to create opportunities for yourself and accelerate career development.

Business Law
Business Law exists for students who aspire to become business savvy with both a solid knowledge of the legal system and an first-hand insight of the business environment. The programme focuses on gaining a global understanding of the challenges faced by the European Union in the 21st century with a legal perspective on international taxation, geopolitical policies and innovation law through the third industrial revolution.

Prof.dr. Philip Vergauwen is the Dean of the Solvay Brussels School of Economics and Management at the Université libre de Bruxelles. He studied Economics at the KU Leuven and at the London School of Economics and obtained his PhD at the KU Leuven.

Vergauwen held various positions at different universities (KU Leuven, UHasselt, University of Auckland and Universiteit Maastricht). He chaired the University Council in Maastricht and was previously the Dean of Hasselt and Maastricht University. He has a significant international experience in accreditation (Equis and AACSB), was AACSB Board member and continues to serve on international accreditation Peer Review Teams. He has a clear vision of internationalisation and a solid international network.
About the teachers...

Mr. Michel Allé is graduated in civil engineering and holds a degree in economics at the ULB. For 4 years, he was the chairman of the Solvay Business School. He is a Professor at Université Libre de Bruxelles for more than 30 years. In the past Mr. Allé held various positions as Chief Financial Officer of the Brussels Airport Co. or Chief Financial Officer of NMBS Holding NV. He is currently an independent director and chairman of the audit committee at Elia and Dim3 SA.

Mr. Benjamin Beeckmans is a Commercial Engineer, graduated from ULB-Solvay and a Professor of Entrepreneurship since 2004. In fact, he is an entrepreneur who is passionate about innovation and Web's professions. He held several finance and marketing positions at Procter & Gamble and Coca-Cola. He is also the creator of Bluecorp, an IT development company based in Sri Lanka, and an online tea sales company called Teatower.com.

Mr. Bruno Wattenbergh hosts a daily radio chronicle and teaches Strategy and Entrepreneurship at the Solvay Brussels School of Economics and Management. He taught strategy & entrepreneurship for about 11 years in different business schools in Brussels and abroad. This professor is also an alumni of MIT Sloan School of Management and Harvard Business School. He is the Chief Operational Officer and Founder of the Brussels Enterprise Agency (ABE-BAO-BEA). Mr. Wattenbergh specializes in Strategy and Management. He enjoys teaching the needs of SME and new ventures, Public Institutions dealing with enterprises, and Strategy & Entrepreneurship.

Sport Challenge
Starting your day with a great workout is surely the healthier way to begin your day! Join our motivated sports coach and maximise your calories burn! The early workout is of course challenging but also really rewarding because you will be full of energy all the day long. Surpass your own limits and join us on weekdays for 30 minutes of running, squats and many more!

Marketing Challenge
Before launching a new product, every company needs to make smart decisions in order to submit the right product to the targeted consumer.

Your team’s job will be to strike the goals of the company by giving the best management process from concept to customer!

Exploit the differences of your mixed group and show that connecting to other’s experiences can build stronger arguments!

Strategy Challenge
Have you ever considered learning more about the real challenges of a renowned company? Improving your teamwork skills while working with people from different backgrounds?

This is what the Strategy Challenge is all about! The purpose is to be inventive and think outside the box in order to solve a real study case! With every information at your disposal, find the most strategic way to satisfy the needs of a company.

Pitch Challenge
How about convincing a customer or a company to buy your upcoming product in 2 minutes?

As part of the business process, this is something occurring everyday as employers really appreciate you to be flexible and spontaneous! Show your creativity, quick-thinking and certainly your ability to bounce back on your partner’s ideas!

... and many more!

Discover our brand new programme in partnership with QTEM!

Business focus

Digitalization has proved to have a profound impact on fashion industry. It moved retailers from a brand loyal customer base market to a strongly competitive landscape on which educated customers are comparing assortments to get the most value in their purchase.

On the other hand, Big Data techniques are enabling fashion retailers to make smarter data-driven decisions on their assortments, pricing and discount to react quickly and stay competitive in this new environment.

In this summer school, active entrepreneurs from the Big Data and Analytics industry will introduce you to the business challenges raised by this data analytics (r)evolution. But also, how to tackle them through practical case studies.

QTEM Summer School
Data Science in the Fashion Industry
August 16 th -25 th 2019
SBS - Brussels

Develop your Data Science skills

This summer school is a unique opportunity to develop or improve your practical data science skills heavily demanded by most industries today.

This course will walk you through the latest developments in Artificial Intelligence, Data Science and their impact on the fashion industry. It will be articulated in five full-day courses: 2 hours theory and 5 hours practice on average per day.

We will introduce basics of web scraping, NoSQL databases, Data Mining, Machine Learning and Text Mining. All concepts will be developed through guided and practical sessions where you will get familiar with Python, one of the most intuitive, versatile and popular programming languages for Data Scientist, but also one of the most prized by employers.

A certificate will be provided to the participants at the end of the summer school. This certificate should allow them to obtain 3 ECTS in their respective institutions.

In collaboration with the Solvay Summer School*

- Welcome Dinner on Friday 16 th
- City Tour of Brussels on Saturday 17 th
- Ice Breaking on Saturday 17 th
- City Tour of Bruges on Sunday 18 th
